

**We would like to introduce you to three optional additional procedures available to you at the HealthView Center.**

1.

### **1. MRI of the Brain.**

Utilizing Open (non-claustrophobic) Magnetic Resonance technology, we are able to obtain excellent imagery of the head in a comfortable atmosphere. This examination goes hand-in-hand with the HealthView philosophy of early detection, and is recommended for patients interested in obtaining a preventative evaluation including the brain. This examination is available to HealthView patients at a reduced price of **\$350**

2.

### **2. Color-Flow Carotid Ultrasonography.**

Using state-of-the art color-flow Doppler ultrasound technology, we will evaluate your carotid arteries for the presence of plaque and decreased flow of blood to the brain. This is an excellent early non-invasive way to investigate your risk for stroke. This comprehensive color-flow Doppler can be done in conjunction with the HealthView examination. If you have two or more of the risk factors for stroke, this examination should especially be considered. This examination is available to HealthView patients for an additional price of **\$295**.

Risk factors for stroke include:

- Family history of stroke or heart attack.
- Elevated blood pressure, or treatment for hypertension
- Smoker, or live/work with people who smoke regularly
- Diabetes
- High Cholesterol, or currently being treated for high cholesterol
- Physical activity level less than 30 minutes on most days
- Overweight by 20 pounds
- Coronary Artery Disease
- Irregular heartbeat

### **3. Three-Dimensional Computerized Tomography (CT) of the Cervical Spine**

Using HealthView's proprietary Scribe software, 3-Dimensional rendering of the Cervical (neck) vertebrae is performed. Indications for this procedure include neck pain/stiffness, arthritis, and spinal stenosis. This examination is available to HealthView patients for an additional price of **\$395**

**If you would like to add any or all of the above examinations to your HealthView visit, please call the scheduling center at 949-717-4500. The prices listed above are for payment at time of service (insurance billing not available for these procedures).**

3.
